## ANALYST REVIEW – USPTO REPORT

### Search Information

Type of Search: **U.S. Full Search**  
Mark: **BRUXER**  
Goods/Services: **DENTAL IMPLANTS; DENTAL IMPLEMENTS; ORAL CARE PRODUCTS; DENTAL AND ORTHODONTIC GOODS; DENTAL AND ORTHODONTIC SERVICES**

### Data Information

This search report includes information from the USPTO Official Gazette published on **10/09/2012** and pending applications filed through **10/05/2012**. The pending applications are received from the U.S. Patent and Trademark Office and are updated to our database as they are made available.

Our database includes active USPTO text records dating from **1884** to present.

All queries in the Search Strategy below have been applied to all active applications and registrations in our database, as well as inactive USPTO applications and registrations from 01/01/2007 to the present. Inactive USPTO applications and registrations from 01/01/1984 – 01/01/2007 were searched for identical trademarks.

### Last Reported Owner

“Last Reported Owner” is our best determination of the owner of a trademark, based on a programmatic analysis of USPTO trademark records and any assignment transactions associated with the trademark. In determining “Last Reported Owner”, we exclude recorded documents representing security interests, liens and other transactions which ordinarily do not result in a change of ownership.

### Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

### Global Filings

A Global Filings flag indicates how often owners of cited USPTO trademarks have filed for protection of the cited marks outside the United States. We compare the owner and trademark, as listed in our proprietary USPTO database, to our worldwide trademark databases. The worldwide trademark databases include first publications since January 1, 1976. (For China, only trademarks published since January 1, 1986 are included). In most of the over 200 countries, first publications are new applications published in the Official Gazettes for opposition purposes.

Please Note: Global Filings provides an indication of international trademark filings, but should be considered advisory information only, due to possible inconsistencies in the data and the update frequency of trademark records provided by international trademark offices. Furthermore, the documentation does not include renewals or indications about the subsequent fate of the applications retrieved, such as registrations, rejections, withdrawals, amendments and partial cancellations. For additional information, please refer to the electronic version of this search report, accessible through your SAEGIS™ Inbox.

### Earliest Date in Record

The Earliest Date in Record is an added field derived from a programmatic review of all available fields within a given record to estimate the earliest date by which the trademark can claim protection. Fields reviewed can include the Date Filed and First Use Dates for both U.S. and international protection. Please note that not all records with a status of MISASSIGNED will be included, as many of these records do not contain dates. This field is designed to be a helpful reference tool only; further research may be required to determine the mark's priority rights.
